DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 12, and 14-16 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 11, and 12 of U.S. Patent No. 6,741,900. Although the conflicting claims are not identical, they are not patentably distinct from each other because the divisional application is simply a less detailed version of the patented parent case.

Claim Objections

3. Claim 16 is objected to because of the following informalities: it is dependent on a canceled claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2125

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 12, and 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Suzuki et al. U.S. Patent 6,108,586. Referring to claims 1 and 12, Suzuki discloses a design support apparatus and method comprising: an input reception unit; a strength calculation unit; a stress calculation unit; and a comparison report unit, wherein: said input reception unit (col. 15 and 16, lines 53-63 and 7-15) receives an input of a parameter name of a product to be designed and a parameter value associated with the parameter name (col. 19, lines 51-60); said strength calculation unit calculates a strength value of the product to be designed using the parameter name and the parameter value whose input has been received, in accordance with a predetermined calculation procedure (col. 21, lines 10-23); said stress calculation unit calculates a value (stress value) of a stress which is applied to the product to be designed using the parameter name and the parameter value whose input has been received, in accordance with a predetermined calculation procedure (col. 21, lines 24-39); and said comparison report unit compares the calculated strength value with the calculate stress value (col. 21, lines 24-39), and reports report information which is associated with the comparison in a case where the comparison satisfies a predetermined condition (col. 26 and 27, lines 60-67 and 1-5). Referring to claims 14-16, Suzuki discloses a program for causing a computer to act as the design support apparatus (col. 7, lines 9-18).
